

# MAPPEDIN AIRPORTS

Whether it's helping travelers find gates, food, services, or providing real-time flight information, Mappedin Airports improves the passenger travel experience, using only their web browser. No apps required.

## INTUITIVE DIRECTIONS

Passengers travel effortlessly from parking garages and through the airport leveraging landmarks on step-by-step directions that are optimized for desktop and mobile view.

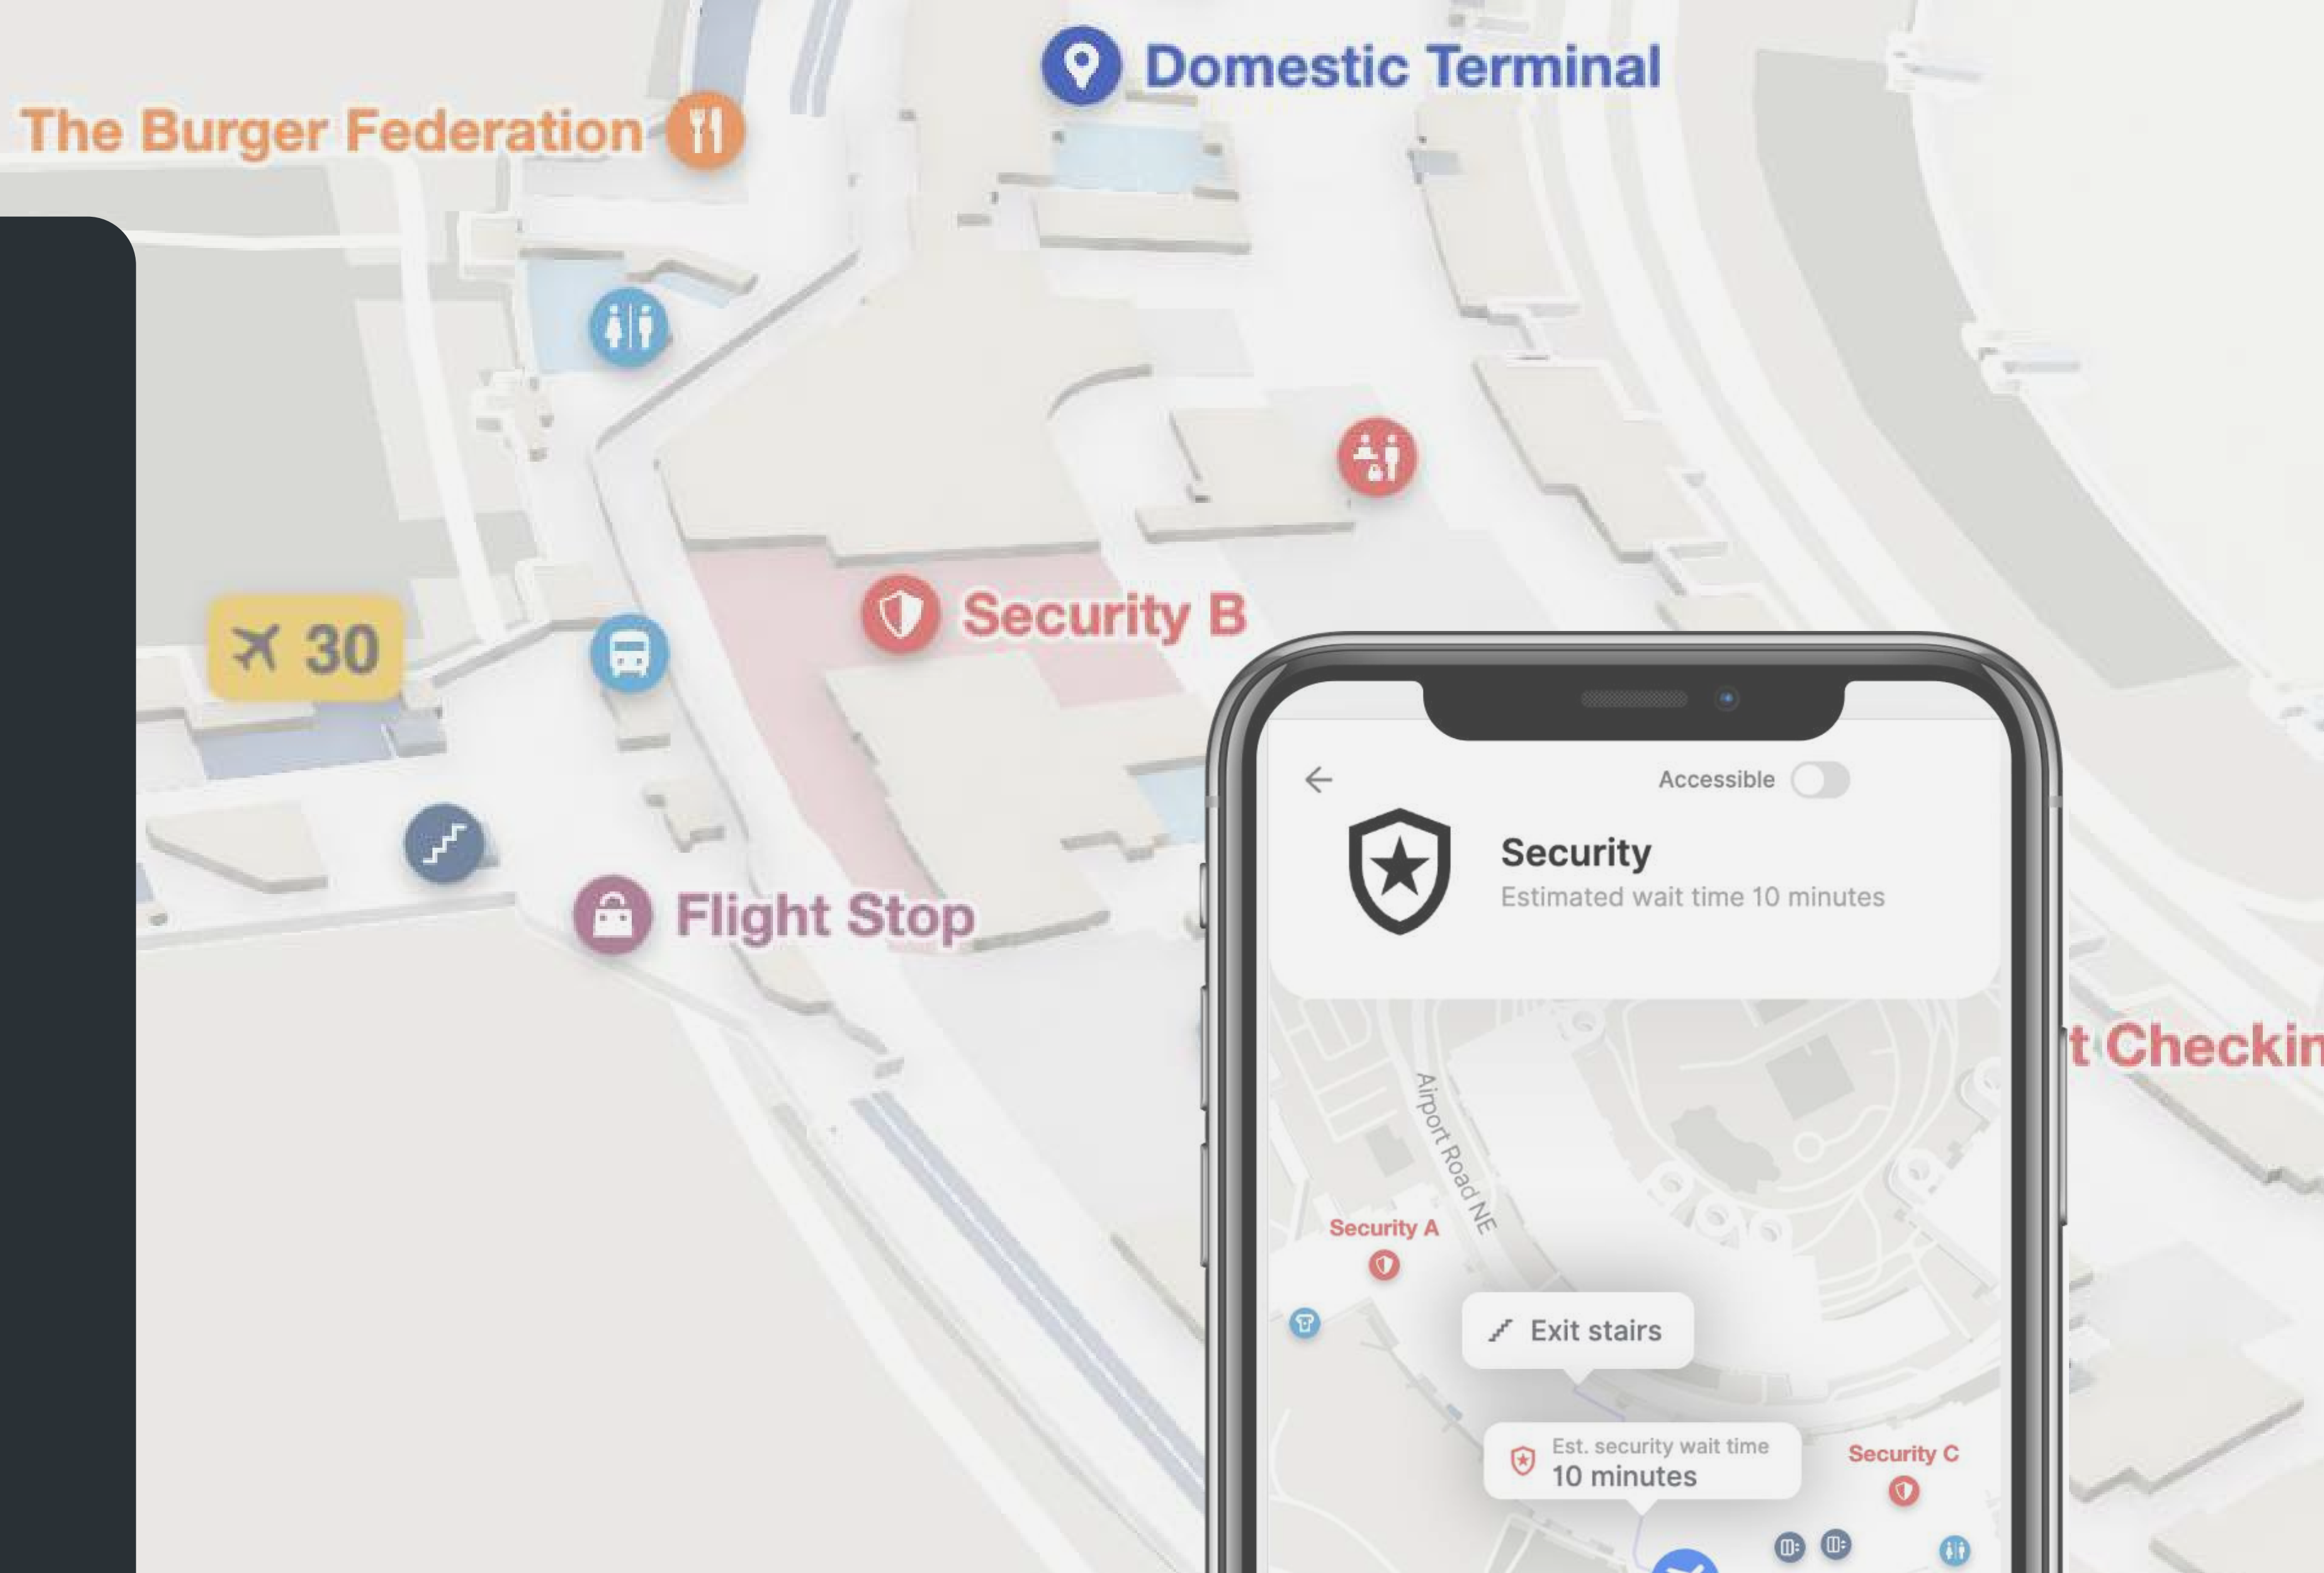

## AIRPORT MANAGER

Control the flow of passengers by closing or opening security checkpoints and elevators from a mobile device. Ensure that passengers are routed efficiently and without frustration.

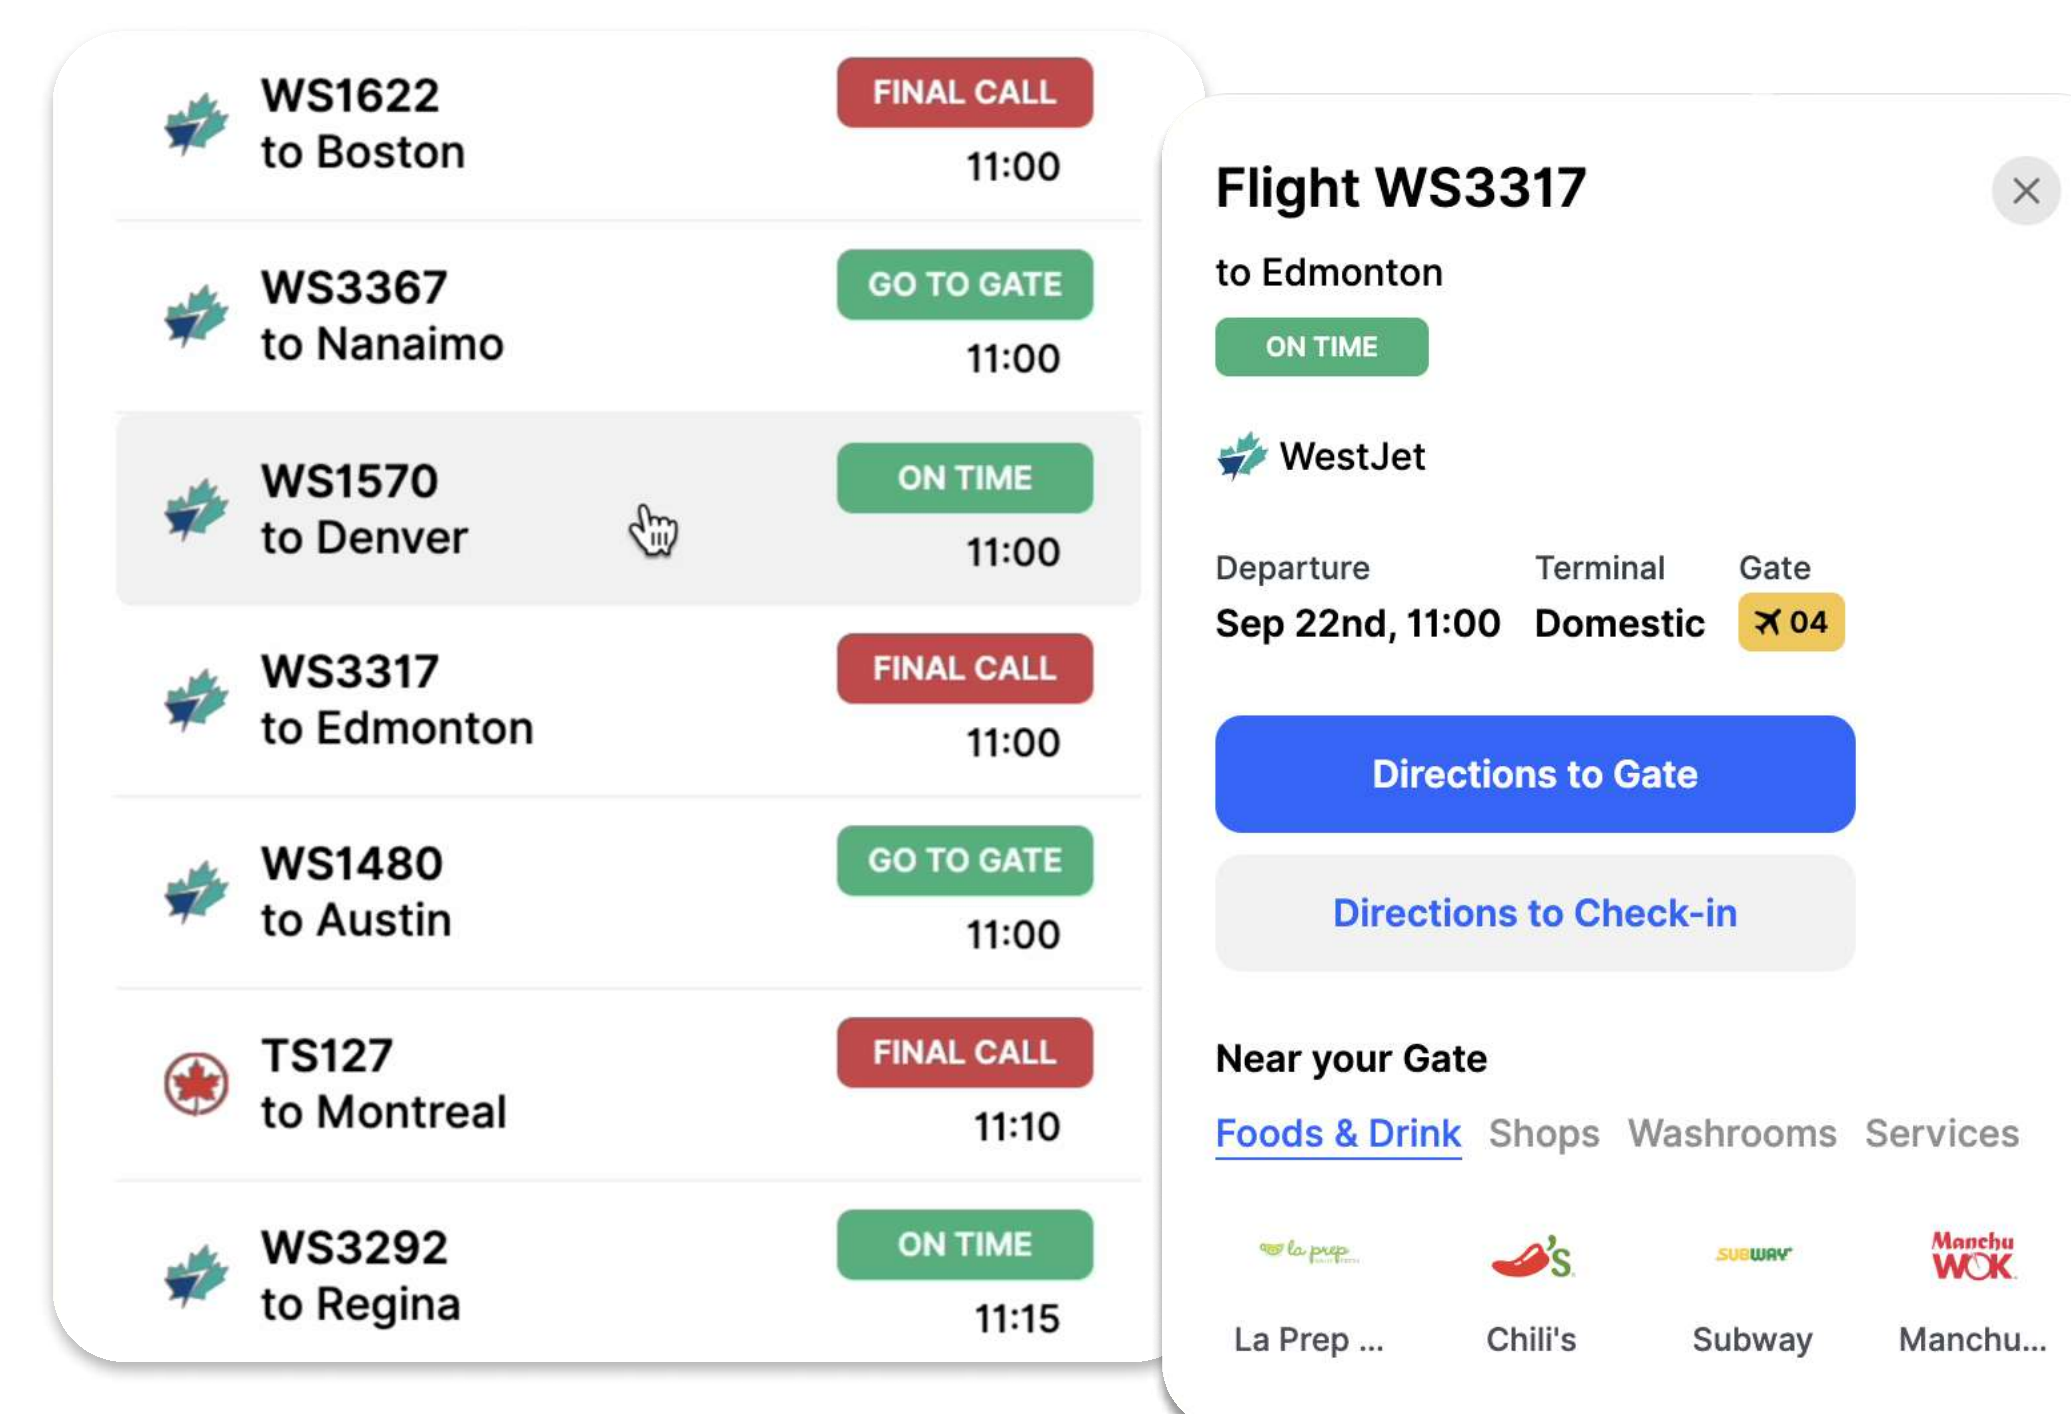

## DRIVE YOUR BUSINESS

Draw powerful insights from the usage of your maps to make informed decisions on your business. Understand information such as passenger searches and flow of travellers, visualized on graphical dashboard or contextual heat map.

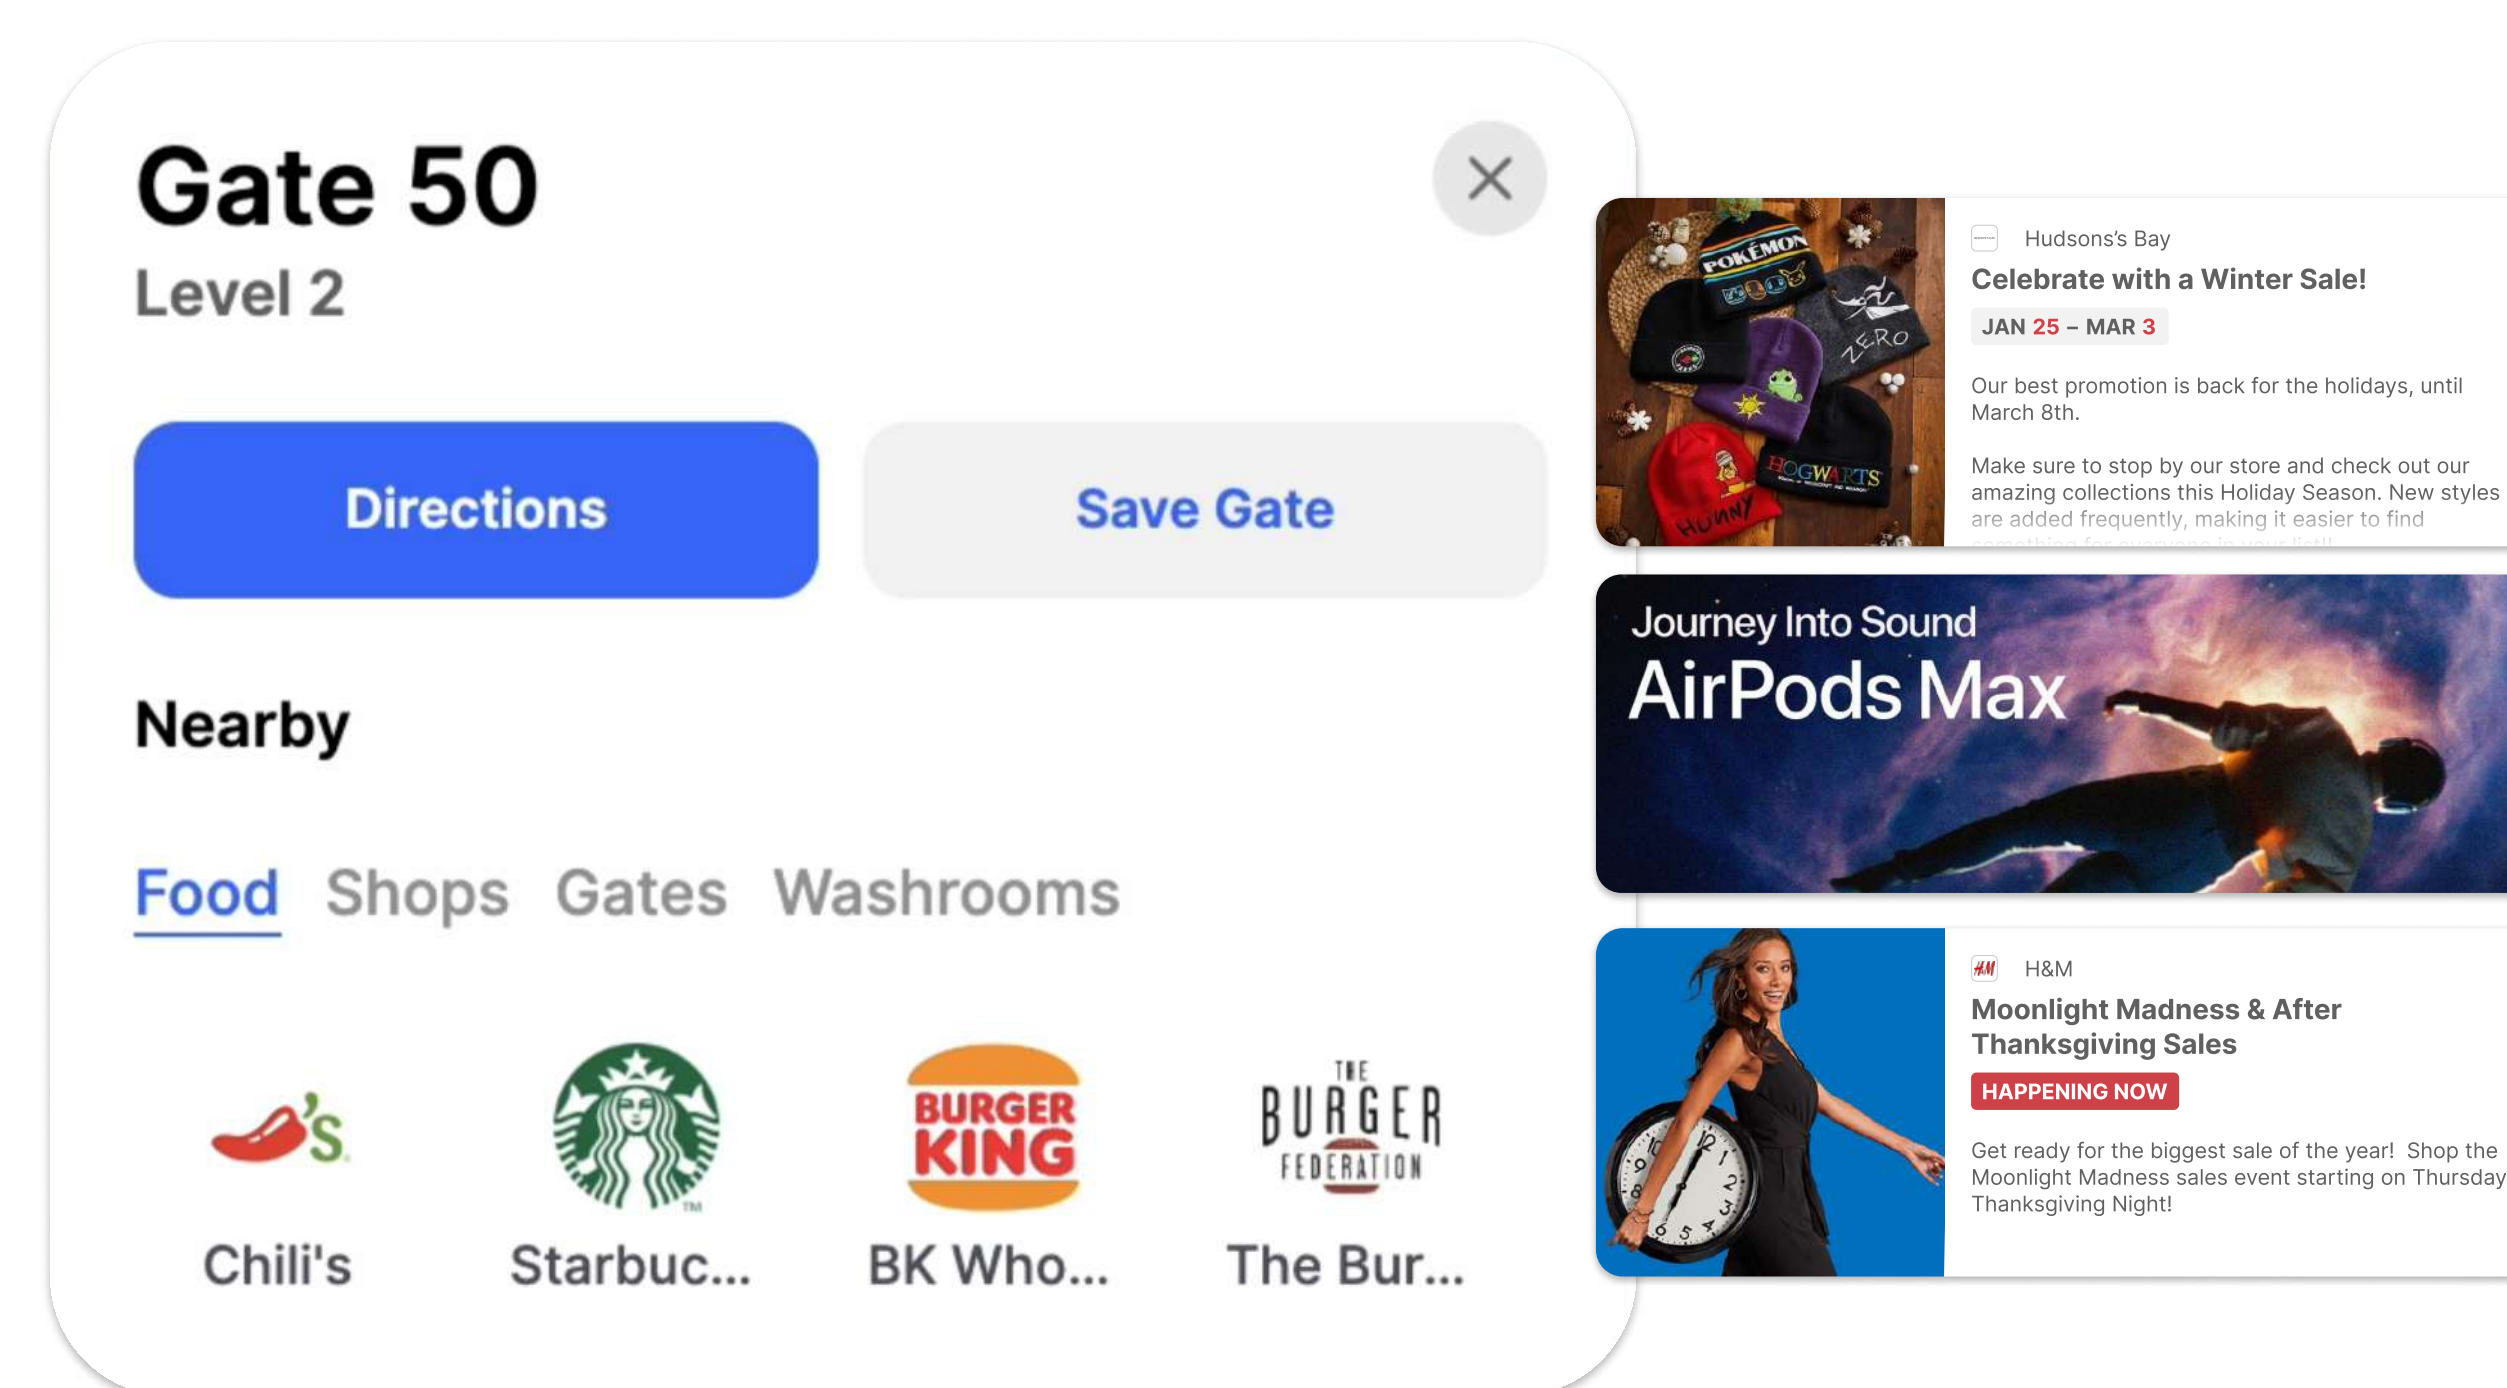

## REAL-TIME FLIGHT INTEGRATIONS

Passengers can search for flight number, airline, or destination city to locate their departure or arrival gate. Security wait-times are integrated with directions and timing to provide passengers a holistic understanding of their journey.

## GENERATE REVENUE

Highlight services and promotions through your airport map to make it easy for visitors to discover and purchase from on-site restaurants and retailers. Mappedin Airports automatically promotes locations within a set walking time in high-visibility gate cards and makes it easy to integrate with other systems for additional functionality.
